

KEEP YOUR PUMPS RUNNING SMOOTHLY

National Pump & Energy (NPE) are the leading experts in Pump Fleet Management.

Our dedicated and experienced team can assist you with all aspects of your project from site inspection through to system design, project costing, equipment selection, in-house construction – assembly, testing, installation, commissioning, maintenance, operation and/or complete project management, where required. The detailed on-site (or remote if required) inspection and assessment will ensure that the designed solution will produce the most effective and reliable outcome whilst reducing potential delays and bottom line impacts to your project. NPE maintains a large inventory of genuine replacement parts, which allows for quick delivery.

NPE's routine maintenance ensures all equipment is cleaned, inspected and tested for performance and safety prior to dispatch. We have the experience, capacity and most importantly, commitment, to assist you with your project anywhere in Australia. We are OEM suppliers of Cornell, Minetuff, Caprari, BBA Pumps, Sulzer, Atlas Copco and Crusader Hose.

Service Delivery

- Site assessment
- Fit for purpose system design
- Project management
- Pumps, pipes, valves, controls and accessories

- Fabrication, repair and overhaul of NPE fleet and client units
- Unlimited power via on site generators for testing of large electric sets
- Pressure testing facilities
- Boiler making and fabrication facilities
- Paint booths
- Wash Down Bays

Improvements big and small

Some of the improvements we make are small, some more comprehensive. By developing an entirely new platform – including new motors, seals, hydraulics and bearing arrangements – users get a more robust pump that offers greater value for money than ever before. Continually adjusting to change and expanding our selection are key to developing better pumps.
