

# NPE IS YOUR INDUSTRY LEADING INDUSTRIAL PUMP SUPPLIER

ARE YOU LOOKING TO PURCHASE PUMPS?  
WE OFFER ALL THE LEADING BRANDS AND  
NATIONWIDE DELIVERY.

Our team in Australia is capable and well-informed to deliver dependable sales and services for industrial pumps. We specialise in designing pump solutions that cater to your industry's specific needs, which can help you improve your productivity and reduce your expenses.

Our pumps are available in a variety of sizes and specifications. Selecting the right pump for your needs is crucial and we understand that. Our team of experts has extensive experience in working with pumps and providing tailored solutions to meet your specific requirements.

## Pumps we offer:

- Drainage and sewage pumps for applications in building services and raw sewage transfer in municipal systems
- Industrial Pumps for Mining
- Municipal Pumps

## Municipal pump solutions

When it comes to providing access to clean water and ensuring proper disposal of wastewater, it's crucial to have reliable and efficient pump solutions.

## Mining Pump Solutions

Our commitment to delivering solutions that reliably handle viscous and abrasive media has driven the development of rugged, explosive-proof pumps. Our pumps are the top choice for smooth, efficient, and consistent operation with minimal downtime.

We prioritise providing cost-effective solutions by offering high-quality products from the world leaders in pump manufacturing and Australia-wide delivery.

We offer a variety of pumps designed for the mining industry to cater to your specific needs. Our range includes slurry pumps, borehole pumps, self-priming pumps, magnetic drive pumps, diaphragm pumps, centrifugal pumps, and submersible pumps.

## Dewatering Pumps

The Dewatering Pump provided by NPE are highly reliable and efficient unit available in both diesel and electric variants. It is capable of separating water and solids and can be used as a groundwater pump as well as a surface water pump. Pumps are designed to operate quietly in noise-sensitive areas, thanks to its secure enclosure.

It is primarily used for high-flow rate applications, such as removing groundwater, surface water, and rainwater from excavations, footings, trenches, civil works, manholes, ponds, and other similar areas.

## Benefits:

- Bunded unit with skid mounted or trailer options available
- Reliable double mechanical seals allow dry running and will prime automatically when liquid is present
- Rugged construction requires minimal operator maintenance
- Pumps compatible with Lamella Clarifiers and Chemical Dosing Systems to treat contaminated water
